

Advanced cybersecurity solutions for **FINANCIAL SERVICES**

Every day, businesses and individuals entrust financial services organizations with their most sensitive and critical data. Risk is not a new concept for the industry; it was built upon security and privacy. But as sophisticated banking technologies and the use of complex cloud services have increased, so have scrutiny and compliance mandates.

Because we understand the unique challenges financial organizations face, you can trust that our IT audit, compliance, and cybersecurity technical services will help you meet regulatory mandates, manage risk, and build your security posture.

We believe that
security and privacy
are basic human rights.

We are built to
protect them.

Services and Solutions, Right-Sized for You

Your business needs and key risks are unique, so we design custom assessments, build effective risk mitigation strategies, and engineer solutions to solve your most complex issues. We'll never try to stuff you into a box, and you can trust that you'll always have clear, actionable information delivered by our industry leaders.

Comprehensive Cybersecurity Strategy / vCISO

Establish and execute
long-term cyber strategy.
Leverage a virtual CISO.

Offensive Security and Testing

Examine your cyber risk from every angle and strengthen your security posture with a proactive approach.

Defensive Security

Prepare for the threats waiting to do you harm and quickly resolve security incidents.

FFIEC Compliance

Make sense of technology and FFIEC compliance in an efficient and effective way, adding value to satisfy examiners and corporate directors.

Information Technology (IT) Audit

Understand your key technology risks and level of mitigation in place with an objective IT audit.

Third Party Risk Management

Mitigate risks posed by third-party relationships through proactive assessments, analysis, & controls.

Advanced cybersecurity solutions for FINANCIAL SERVICES

GO BEYOND JUST CHECKING THE BOXES

In the financial services industry, executives who lead internal audit and cybersecurity functions are charged with keeping sensitive and critical data safe.

Regular audits are expected, but as the threat landscape evolves, **you need a fresh approach** to stay ahead of the threats and to address your weaknesses BEFORE an examiner points them out.

Echelon Risk + Cyber is uniquely positioned to help financial services organizations go BEYOND just checking the boxes for your audits. We help you become more strategic and innovative, ultimately improving your security posture for the long haul.

Advanced Services Include:

Active Directory Security Assessment

Active Directory is the central nervous system for your network, we help uncover hidden attack paths lurking in the settings.

Penetration & Web App Pen Testing

Instantly evaluate your cyber resilience through realistic attack scenarios aimed at your organization, systems, and web applications.

Social Engineering

Identify and prevent social engineering attacks through advanced simulations and hands-on instruction.

Red Teaming

No holds barred attack emulation built to mimic the threats that test your overall security. Obtain valuable insight into your strengths and exploitable weaknesses.

Purple Teaming

Collaborative attack scenarios with a heavy focus on prevention, detection and response. Understand how your people, processes and technology react to a threat.

Strengthen Your Security with a Partner who Offers:

- **Deep financial industry experience:** we know what's required and go beyond it
- **Collaborative team:** our team of hackers, tech teams, and auditors stay coordinated for a unique and customized solution
- **Fresh approach:** we take audits beyond the baseline to consider emerging threats and new operational areas
- **Strategic focus:** we help you build a customized future vision that keeps you ahead of the game (and the threats) for the long term
